

## **MaxorPlus Preferred Drug Formulary**

Please bring this guide with you on your next doctor visit.

**MaxorPlus Preferred Drug Formulary** is a formulary list of medications that may be covered under your prescription drug plan. This list was reviewed by an independent group of practicing doctors and pharmacists, and it contains medications made by most pharmaceutical manufacturers. It includes medications for many covered conditions.

## **SAVING MONEY ON PRESCRIPTIONS**

Your plan may prefer some medications over others. These are called *preferred drugs*.

*You may pay:*

- Lowest co-payment/co-insurance for generic drugs
- Higher co-payment/co-insurance for preferred brand-name drugs
- Highest co-payment/co-insurance for nonpreferred brand-name drugs

**Your doctor may be able to help you save money by prescribing generic and preferred brand-name drugs if appropriate. So be sure to bring this guide with you on every visit to your doctor. Some commonly prescribed nonpreferred drugs are also listed in this guide for your reference.**

**Please note:** This guide does not contain a complete list of preferred drugs and nonpreferred drugs. It only lists the most commonly prescribed drugs. For an updated and complete listing of your prescription benefit, visit [www.maxorplus.com](http://www.maxorplus.com) and click on formulary listings under common questions. To view your plan's formulary, enter your MaxorPlus group number in the group ID field. You may also contact the MaxorPlus Customer Service Department at 1-800-687-0707.

Not all medications listed here are covered by every prescription drug plan. In addition, certain restrictions, quantity limits, prior authorization requirements or special copays may apply. Depending on your prescription drug benefit, if you or your physician request a brand name drug which has a generic equivalent, you may be responsible for paying your copay plus the price difference between the generic and equivalent brand name drug. As brand name drugs become available generically, only the generic will be considered formulary.

## FINDING MEDICATIONS WITH LOWER CO-PAYMENTS/CO-INSURANCE

This guide lists medications two ways to help you find some generic, preferred, and nonpreferred brand-name drugs.

### SECTION I - ALPHABETICALLY BY DRUG CATEGORY (SUCH AS RESPIRATORY)

Within each category, medications are listed in alphabetical order, with generic, preferred brand-name, and nonpreferred brand-name drugs sorted separately:

- G Means a preferred generic medication
- P Means a preferred brand-name medication
- NP Means a nonpreferred brand-name medication

### SECTION II - ALPHABETICALLY BY BRAND NAME

After each nonpreferred brand-name drug, you will find possible generic and preferred brand-name alternatives.

## SAFETY CONSIDERATION SYMBOLS

Here is a quick guide for you and your doctor, which explains our safety symbols. These symbols appear next to certain medications.

-  Means weigh risk of birth defects or other adverse outcomes.
-  Means do not use in pregnancy.

*The information in this guide was in effect at the time of printing and may be subject to change.*
